EDUCATION

B.Tech – Computer Science Engineering, SRM Institute of Science and Technology Apr 2025
Specialization in **Software Engineering**
Relevant Coursework: **Data Structures, Algorithms, Object-Oriented Software Development**, Applied Mathematics
GPA: 8.2 / 10.0

EXPERIENCE

Standard Chartered GBS - Bangalore Jul 2025 – Present
Technology - *Apprentice*

- Engineered internal **Artificial Intelligence** chatbots utilizing Retrieval-Augmented Generation (**RAG**) and **NLP** to streamline information retrieval and improve customer experience across proprietary banking systems.
- Formulated **Machine Learning** and **Deep Learning** pipelines for fintech challenges, driving **Automation** and risk analysis to optimize manual business processes and reduce processing time by 20%.
- Built and deployed a **Microservices**-based **Java (Spring Boot)** API for data remediation within an **Agile/Scrum Methodology** framework; featured modular **OOPs** workflow logic and automated CI/CD with Azure Pipelines.

PROJECTS

Cloud-Native Inventory Management System Mar 2026
Developed a full-stack, two-tier platform applying **Object-Oriented Software Development** principles. Utilized **ReactJS** and Vite for responsive UI workflows, and **Java (Spring Boot)** with MongoDB for backend **Microservices**. Automated containerized deployment using Docker, Kubernetes concepts, and AWS Fargate, maintaining an **Agile** release cycle.

Finance RAG Application (AI & NLP) Mar 2026
Engineered a financial insights platform utilizing **FastAPI** to ingest SEC filings and generate grounded answers. Implemented **Applied Mathematics** and complex **Algorithms** for hybrid retrieval (ChromaDB + BM25) with cross-encoder reranking, improving retrieval precision (Recall@5) by ~52% over baseline vector searches.

Efficient LLM Finetuning (Deep Learning) Oct 2025
Implemented parameter-efficient finetuning (PEFT) on the Google Gemma 2B model utilizing LoRA and 4-bit quantization, demonstrating advanced proficiency in **Machine Learning** and scalable **Artificial Intelligence** customization.

End-to-End MLOps Pipeline Feb 2024
Automated the complete model lifecycle with an MLOps architecture to drive business analysis and prediction accuracy, achieving an R^2 of 88.28% via robust **Data Structures** and data engineering workflows.

TECHNICAL SKILLS

Languages	Java (Programming Language), Python, SQL, JavaScript
Frameworks & UI	Spring Boot, ReactJS, AngularJS concepts, Flask, PyTorch, TensorFlow
Cloud & DevOps	Microservices, Docker, AWS, CI/CD, Automation , Git/GitHub
Core Competencies	Object-Oriented Software Development, Agile Methodology, Scrum Methodology
AI & Analytics	Machine Learning, Deep Learning, NLP, Algorithms, Data Structures

ACHIEVEMENTS & ACTIVITIES

- Competitive Programming:** Actively participate in problem-solving forums (LeetCode, **HackerRank**, **TopCoder**), solving 300+ problems focused on advanced **Algorithms** and **Data Structures**.
- Open Source & AI:** Completed the DeepLearning.AI certification on advanced **Machine Learning** algorithms and actively contribute to **Open Source Technology** integrations using LangChain and HuggingFace.
